INTERCEPT ADDS TWO NEW HEATING UNITS TO ITS FLEET

October 1, 2013 – Intercept Energy Services Inc. (formerly Global Green Matrix Corp.) (the “Company”) – TSX Venture: IES Is pleased to announce it will be taking delivery of 2 new tri axle Peterbilt trucks designed and installed with state of the art highly efficient, proprietary heating technology. The trucks will be added to the Company’s existing fleet and will be used to heat water used for frac’ing purposes.

Randy Hayward President and CEO states "The addition of 2 more units will provide us with more versatility and flexibility with respect to expanding our customer base. Our primary goal is to continue to create value for our shareholders as we expand throughout Western Canada, and into the USA."

These additional units are the 6th generation of the frack water heating technology and have gone through significant enhancements that have shown improved performance of these highly specialized frac water heating units. Intercept Energy has additional units being manufactured to meet the demand within the industry. These additional units are expected to be delivered this month.

The Company also announces that in relation to its Stock Option Plan it has cancelled 2 million options previously issued in April 2013 to a Consultant. The options were set at a \$0.10 exercise price and were to expire on April 17, 2017.
